

## PROJECT DEVELOPMENT PHASE

## PROJECT DEVELOPMENT - DELIVERY OF SPRINT-4

Date	18 November 2022
Team ID	PNT2022TMID34017
Project Name	Project - IoT Based Safety Gadget for Child Safety Monitoring and Notification

[illegible]

Node-RED interface showing a flow diagram and a configuration panel for a cloudant out node.

**Flow Diagram:** The flow starts with an 'inject' node, followed by a 'function' node, then a 'msg.payload' node. It continues through several 'function' nodes, including one labeled 'geoence', and ends with an 'http request' node. There are also 'switch' and 'range' nodes in the flow.

**Edit cloudant out node configuration:**

- Service: External cloudant or couchdb service
- Server: https://93dc8794-df75-4ee1-a851-2626
- Database: childsafelydb
- Operation: Insert
- Only store msg.payload object?: ☐
- Name: Child
